

Are you interested in science and technology?
Do you love to tell stories? Are you a filmmaker?
If yes then check out:

GENE SCREEN BC

Genome BC and the BC Clinical Genomics Network are launching
The First Annual Genomics Short Film Competition
to explore the world of human genetics on the screen.

Many people don't realize the impact that genomics can have on our daily lives. Help us explain the exciting world of genomics by making a film.

Entries can use the approach of a personal journey, animation, investigative journalism or documentary to tell a compelling story about genomics.

Short films (3-10 mins) can be about the ethical dilemmas or hopes and promises of genomics; show how personalized medicine and consumer products will change our world; or explain advances in science and medicine.

LAUNCH EVENT

Monday 22nd March 2010

5:30 - 7:30 pm; Museum of Vancouver
(1100 Chestnut St, Vancouver)

Where genetic experts and filmmakers will meet to discuss their film ideas.

Join us to get info, hear inspirational speakers, and more!

Plus prizes to help make films,
\$100 door prize for pre-registered participants.
